

Senior Cloud Infrastructure Engineer

Department: Engineering & Infrastructure Location: Remote / Hybrid Type: Full-Time Level: Senior

About the Role

We are looking for a **Senior Cloud Infrastructure Engineer** to join our growing platform team. In this role, you will design, build, and maintain scalable cloud infrastructure on AWS and GCP, drive reliability and performance initiatives, and mentor junior engineers. You will collaborate closely with product, security, and DevOps teams to deliver resilient, cost-efficient, and secure cloud solutions that power our platform at scale.

Key Responsibilities

- Design and implement highly available, fault-tolerant cloud infrastructure using AWS and GCP services.
- Build and maintain CI/CD pipelines using tools such as GitHub Actions, Jenkins, or CircleCI.
- Manage Kubernetes clusters (EKS/GKE) and containerized workloads using Docker.
- Define infrastructure as code (IaC) using Terraform, Pulumi, or AWS CloudFormation.
- Monitor system health, set up alerting, and conduct root cause analysis for incidents.
- Implement cloud security best practices including IAM policies, network segmentation, and secrets management.
- Optimize cloud resource usage and contribute to cost reduction initiatives.
- Collaborate with development teams to define cloud-native architecture patterns.
- Mentor junior and mid-level engineers through code reviews and technical guidance.
- Document infrastructure standards, runbooks, and architectural decisions.

Required Skills

Cloud Platforms	AWS (EC2, S3, RDS, Lambda, EKS, VPC) or GCP equivalent
Infrastructure as Code	Terraform, Pulumi, or CloudFormation (advanced proficiency)
Containerization	Docker, Kubernetes (EKS, GKE, or self-managed clusters)
CI/CD	GitHub Actions, Jenkins, CircleCI, ArgoCD, or equivalent
Scripting / Automation	Python, Bash, or Go for infrastructure automation
Monitoring & Observability	Datadog, Prometheus, Grafana, ELK Stack, or CloudWatch
Networking	VPCs, subnets, load balancers, DNS, TLS/SSL, VPNs
Security	IAM, secrets management (Vault/AWS Secrets Manager), compliance frameworks

Version Control	Git — branching strategies, PR workflows, GitOps
Databases	Familiarity with RDS, DynamoDB, Redis, or similar managed databases

Education Requirements

- **Required:** Bachelor's degree in Computer Science, Information Technology, Software Engineering, or a closely related field.
- **Preferred:** Master's degree in Computer Science, Cloud Computing, or Distributed Systems.
- **Certifications (Highly Valued):** AWS Certified Solutions Architect (Professional), Google Professional Cloud Architect, Certified Kubernetes Administrator (CKA), or HashiCorp Terraform Associate.
- **Equivalent Experience:** Candidates without a formal degree but with 7+ years of demonstrated, hands-on cloud infrastructure experience will be considered.

Experience Requirements

Experience Level	Requirement
Total IT Experience	7+ years in infrastructure, DevOps, or platform engineering roles
Cloud Infrastructure	5+ years hands-on with AWS and/or GCP in production environments
Kubernetes / Containers	3+ years managing containerized workloads at scale
Infrastructure as Code	3+ years writing and maintaining Terraform or equivalent IaC
CI/CD Pipelines	3+ years building and operating automated deployment pipelines
Incident Management	Experience as primary on-call engineer, conducting post-mortems
Mentorship	1+ years mentoring or leading a team of junior engineers

Nice to Have

- Experience with multi-cloud strategies and cross-cloud networking.
- Familiarity with FinOps practices and cloud cost optimization tooling.
- Knowledge of service mesh technologies such as Istio or Linkerd.
- Contributions to open-source infrastructure or DevOps projects.
- Experience in regulated industries (fintech, healthcare) and compliance frameworks (SOC 2, ISO 27001).

What We Offer

- Competitive salary: \$130,000 – \$175,000 USD annually, based on experience.
- Equity package and annual performance bonus.

- Comprehensive health, dental, and vision insurance.
- Flexible remote / hybrid work arrangements.
- Annual learning & development budget of \$2,500 for courses, certifications, and conferences.
- 401(k) with company matching up to 4%.
- Generous PTO policy: 20 days vacation + 10 public holidays + sick leave.
